IAF Software, Inc. Company Profile

Company Overview

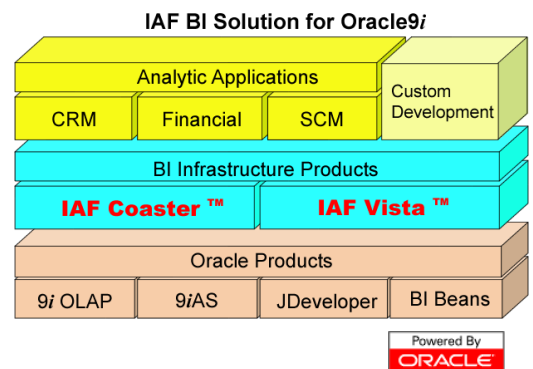

IAF Software addresses a major issue facing many businesses – how to make valuable corporate data more accessible to business users. According to a survey of 100 business-technology professionals conducted by InformationWeek Research and Optimize Magazine in January 2002, 82% of business users cannot design their own queries and reports from corporate data without either knowing the data structure or getting help from their IT department. Drawing on its global consulting experience in the data warehousing area, IAF Software provides enterprise customers with a robust BI application platform that is powerful yet easy to use.

Established in 2000, IAF Software is a private company located in Silicon Valley, and is a subsidiary of IAF Consulting, Inc. Headquartered in Tokyo, Japan, IAF Consulting (www.iafc.co.jp) is the only independent consulting company focusing on the Data Warehouse and Business Intelligence market in Japan. IAF Software leverages its strong relationship with Oracle Corporation's Data Warehouse and Business Intelligence groups to optimize its solutions (IAF Software's products are available exclusively for Oracle).

Products & Services

Business Intelligence Products

- **IAF Coaster™**
 An innovative metadata management tool for Oracle9i OLAP Services that allows customers to create and manage their own analytic models without changing data structures in a corporate warehouse.
- **IAF Vista™**
 An easy-to-use development and deployment environment for Web-enabled OLAP applications that allows business users to create OLAP reports using a point-and-click interface, without support from corporate IT staff.

DW/BI Consulting

- IAF offers consulting to global companies:
- **DW/BI Consulting & Education**
 - **Oracle DW/BI Products Implementation**
 - **OFA Implementation**
 - **Internationalization and global deployment**

Training and Support Services

- IAF provides both onsite and web-based knowledge transfer to its customers and partners:
- **IAF Coaster™ and IAF Vista™ training classes**
 - **Telephone support**
 - **Web-based training and support**
