

OLAP Coaster®

Rapidly Design, Develop, Deploy and Manage
Multi Dimensional Models with OLAP Coaster®

What is OLAP Coaster®?

OLAP Coaster® is an innovative meta management tool for major multi dimensional database and OLAP services, drawing on patent pending meta management technology. IT department can significantly reduce the cost and time to develop/manage the data warehouse and OLAP application. Business users can share and reuse their analytical models, "know-how", in their organization.

The Advantages of OLAP Coaster®

1. Analytic Cube Building & Management

~Provides variety of features needed to create and maintain the multi dimensional cubes on the multi sites. People can realize timely analysis to meet market situations.

2. Business Meta Management & Sharing (Patent Pending Technology)

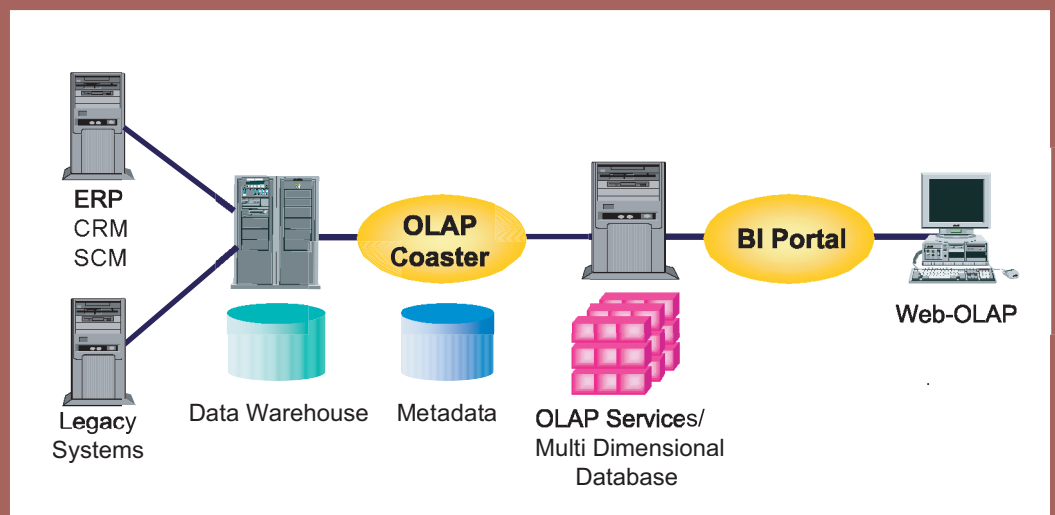

~Enables business users to share and modify their analytic models in a repository. Business and technical metadata are stored in the repository.

3. Rapid & Low Cost Development

~Enables to practice spiral loop development by small group, not waterfall development by large team, the important data warehouse theory "Think Big, Start Small".

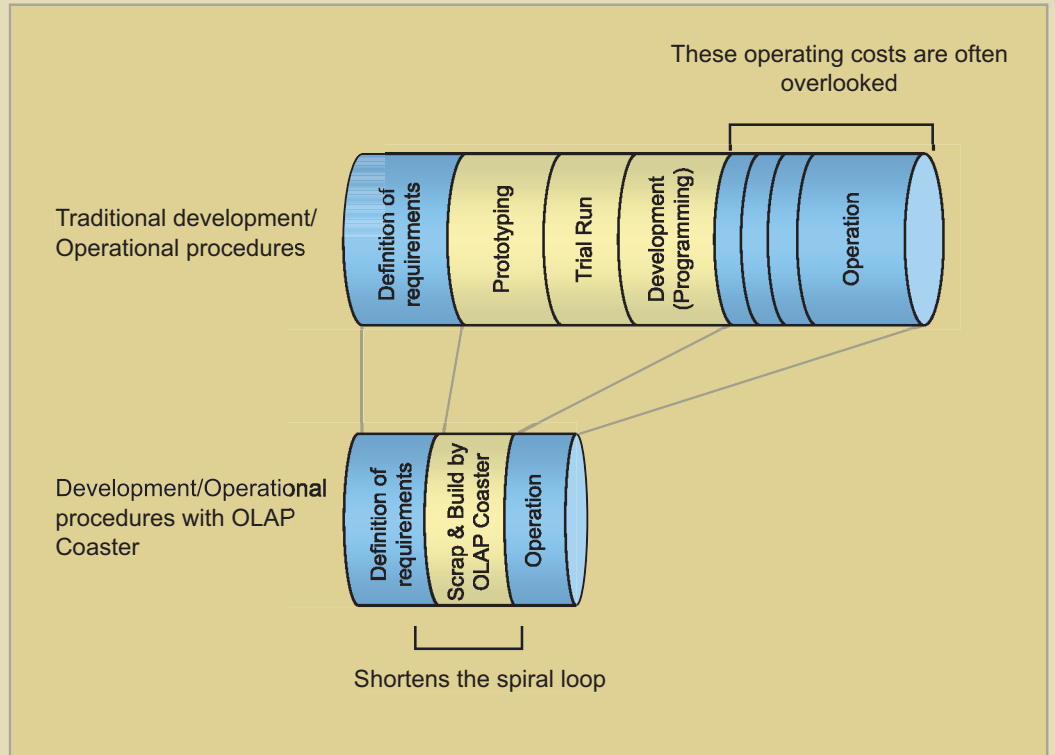

4. Non-Programming

~Automatically creates SQL and 4GL code. No special experience required.

OLAP Coaster[®]

Cost Saving in Development & Management

System Requirement

OS	Windows NT/2000/95/98
Memory	32MB
Disk	10MB
Multidimensional DB or OLAP Services	Oracle Express Server 6.2/6.3 Oracle9i OLAP Services (Planned)
RDBMS(Meta)	ODBC: Oracle 8/8i/9i
RDBMS(DataMart)	ODBC: Oracle 8/8i/9i
